

MULTI MEDIA SHOW (Áine Minogue)

Contact: Aine Minogue at phone: 781 641 0903 (cell) or aine@minogue.com

NOTE:

We do not need sound with the video projections – just visuals.

The idea is to play the videos ‘during’ the show, as part of the show, as opposed to before and after. (More ‘art’ videos as opposed to ‘music videos’)

WHAT WE HAVE:

A professional quality (HD) set of videos on DVD and laptop (MAC)

11 videos in all for projection during some of the songs we perform live.

IDEAL SITUATION:

Everything is set up. We plug in our MAC laptop and have control over when the Video starts and stops. The tech person deals with the rest.

GENERAL:

Projector (capable of projecting a reasonable image to the audience based on the room size) . Starting capability: 2500 lumens

Screen size depends on the specs of the room and the audience capabilities.

Rear mounted projectors preferred

We need to know the size in advance.

Please email digital photos and specs of the room. (aine@minogue.com)

NOTE: All cable lengths should be no less than ten (10) feet

OUTPUT (from our laptop)

MAC: Mini DVI or DVI

PC; S- Video or VGA or possibly DVI

NOTE TO LAPTOP OPERATOR

SOUND

Use headphone “out” from the laptop (has a picture of a headphone)

* Go to System Preferences, turn off any kind of sound cues or alerts

* Plug headphone out (headphone) into

VOLUME

Volume is controlled by the house. (Max sound out on my computer)

Go in and turn off alerts on the computer (System Preferences, turn off any kind of sound cues or alerts)

PLEASE TELL US WHAT THE INPUTS ARE?

Mini DVI (i) to WHICH one of the following:

Mini DVI to VGA

Mini DVI to S Video out

Mini DVI to HDMI

Mini DVI to DVI

Mini DVI to RCA (do you have male to male RCA to RCA)
